## SKILL SET

**Programming Skills:** React JS, Redux, Node JS, Express JS, JavaScript

**Database:** Mongo DB, MySQL

**Operating Systems:** Windows, Mac OS, Linux

## PROJECTS

### Text Utility App

- Developed a SPA using **ReactJS** and **Bootstrap**. It is a text utility tool which when provided with a text gives word count, character count, converts it to upper case and lower case, removes extra spaces, special characters etc.
- Dark mode feature is available which users can use to switch between light and dark theme as desired.
- Uses **React Router** to navigate between pages.

### Dictionary App

- Developed a dictionary which supports 12 languages. It is built using **React JS** and **Material UI**.
- Provides the meaning of the entered words along with examples and synonyms.
- Dark mode feature is available which users can use to switch between light and dark theme as desired.
- Data is fetched using **Axios** from the open source dictionary API.

### Node JS Password Generator

- A command line password generator using **Node JS**. Generates a random password depending on the number of characters provided. By default, it will be a random 8-character password which is changeable through input.
- Generated password can be copied to clipboard and can also be added to a text file.

### Bookmark App

- Developed a Bookmark app which provides an option to add the website name and its URL in the local storage.
- Bookmarked website can be accessed on clicking on saved bookmark. Built using **JavaScript**, **HTML** and **CSS**.

## CERTIFICATIONS

- ReactJS, JavaScript – Udemy
- NodeJS – Pluralsight

## ACHIEVEMENTS

- National Level Badminton Player
- College Football Team Captain
