Motivated individual with around 3 years of work experience across an established global player conglomerate. Working with individual responsibility in designing and building end to end solutions. Capable of handling scale, ambiguity and complexities in problem statements. Looking for roles with a wide scope of responsibility that may push my learning and contribution to the fullest.

EXPERIENCE

October, 2018 – Present
Software Developer, Cognizant Technology Solutions

- Development of Dashboard with multiple tabs for customer info, investment trends and transaction behavior in tabular and graphical representation using React JS and its components.
- Was responsible for design and development of web application for investment advisor to help track its client investments, while working in a six-member team.

EDUCATION

- **B.TECH – Instrumentation & Control Engineering 2014 – 2018**
  Haldia Institute of Technology, West Bengal (8.11 GPA)
- **Higher Secondary Certificate Examination (ISC) 2012-2014**
  Church School Beldih, Jamshedpur (81%)
- **Senior Secondary Certificate Examination (ICSE) 2012**
  Church School Beldih, Jamshedpur (91.6%)

PROJECTS

- **TIC-TAC-TOE Game**
  A two-player web app game using socket programming in Node JS.
- **Digital Property Renting Platform**
  A native mobile app similar to No Broker, for listing and renting the property. The tech stack used is React Native for the front end, Node JS in the backend and Mongo DB is the choice of database.

SKILLS

- Node JS, Express JS
- React JS and Redux
- Proficient in JavaScript and ES6
- RDBMS
- Familiarity with Java programming language
- Problem solving & fundamentals of computer science
